DETAILED ACTION

Prelim./Amdt.

1. Receipt is acknowledged of the amendment filed 05/05/2005.
2. Claims 1-3 are pending.

Response to Arguments

3. Applicant's arguments with respect to claim 1-3 have been considered but are moot in view of the new ground(s) of rejection. The new ground of rejections follows.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Hung (US 6,501,199 B2).

Re claim 1: Hung discloses the claimed illuminating device comprising a casing (6 in Fig. 4) having a central hole (61) for being adapted to receive a wheel axle (9), a plurality of luminous elements (17) connected to the casing, a coil assembly (21) engaged with the casing and wires extending from the coil assembly and electrically connected to the luminous elements (See 16 and 17 in Fig. 4), and a collar (6 and 7 in Fig.4 has a disk-shaped surface) having a disk-shaped surface and an circular magnet (101), the coil assembly (21) rotatably enclosing the circular

Art Unit: 2875

magnet (101), the disk-shaped surface (see 6 and 7 in Fig. 4)) extending radially outward from the circular magnet for shielding a side periphery of the coil assembly.

Re claim 3: Hung discloses a plurality of clamping members of the casing, which are adapted to connect the spokes (see the clamping member at the bottom of Fig. 9).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hung as applied to claim 1 above, and further in view of McGhee (US 5,984,487).

8. Re claim 2: Hung discloses a separation plate (1 in Fig. 4) extending from an inside of the casing. Hung does not disclose that the luminous elements are light emitting diodes. McGhee teaches light emitting diodes as a light source (col. 5, line 50). It would have been obvious to one having ordinary skill in the art at the time of the invention to substitute Hung's luminous elements with light emitting diodes as taught by McGhee because light emitting diode has many advantages such as low energy consumption and long life.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
